SUMMARY

Computer Engineering student with a strong foundation in Java, Data Structures, and backend development. Experienced in building RESTful APIs using Spring Boot, real-time applications with Firebase, and cloud infrastructure through Oracle OCI certification. Skilled in designing scalable systems, debugging, and optimizing application performance. Seeking entry-level Software Engineer roles to build impactful backend systems.

TECHNICAL SKILLS

Languages: Java

Backend: Spring Boot, REST APIs, Firebase

Databases: MySQL, Firestore

Cloud: Oracle Cloud Infrastructure (OCI)

Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

EmpowerHer – Women Entrepreneurship Platform

Java, Firebase, Firestore | In Progress

- Developing a full-stack platform connecting entrepreneurs, investors, and mentors to streamline idea-to-funding workflows.
- Engineered role-based authentication using Firebase supporting 3 distinct user roles — Entrepreneur, Investor, and Mentor — with fully scoped access control.
- Architected a Firestore schema across 5 collections to enable real-time storage and retrieval of business pitch data.
- Designed a structured pitch submission flow with 6+ data fields and a 3-section media upload system (PDF, video, link), consolidating the full pitch workflow into a single interface.

HostelVista – Hostel Management System

Java, JavaFX, Firebase

- Built a modular JavaFX desktop application with 10+ operational modules covering booking, complaints, and inventory management.
- Implemented Firebase Authentication with 3 role-based access levels ensuring secure, permission-scoped operations across all modules.
- Integrated Firestore enabling real-time data sync across 10+ modules, eliminating manual data refresh for hostel staff.
- Automated 4 administrative workflows — room/mess change requests, late arrival logging, leave applications, and mess menu management — digitizing previously paper-based hostel operations.

Student Management System API

Spring Boot, MySQL | 🐙 github.com/Swapnil1854/student-management

- Developed 5 RESTful API endpoints using Spring Boot handling full CRUD operations on student records.
- Designed a MySQL schema with clean entity-repository separation for structured, persistent data storage.
- Validated all 5 endpoints using Postman across success, edge case, and error scenarios ensuring complete request-response coverage.
- Structured codebase using MVC architecture separating concerns across controllers, services, and repositories for maintainability.

INTERNSHIP EXPERIENCE

Software Developer Intern | NEUAI Labs, Pune

December 2025 (1 Month)

- Developed duplicate email validation and error-handling logic for the user registration module, preventing invalid account creation at the API level.
- Implemented a complete password reset feature, handling the end-to-end flow from reset request to secure credential update.
- Collaborated in a 5-member agile team, contributing to backend feature development, debugging, and iterative testing cycles.

EDUCATION

Bachelor of Engineering – Computer Engineering | NBN Sinhgad Technical Institute, Pune **2022 – 2026**
Savitribai Phule Pune University (SPPU)

- Current CGPA: **7.14**

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Foundations Associate** — Oracle University *September 2025*

PUBLICATIONS

- Co-authored research paper “*EmpowerHer: A Digital Platform for Women Entrepreneurship Support through Mentorship, Funding, and Training*” published in **IMRJETS**, November 2025. Paper ID: IRJMETS71100095325

HACKATHONS

- Selected to represent college at **Smart India Hackathon (SIH) 2023** — cleared internal college-level selection round.

COMPETITIVE PROGRAMMING

- Solved **50+** problems on LeetCode covering arrays, strings, and recursion.
